Social Foundations of Limited Dictatorship: Networks and Private Protection During Mexico's Early Industrialization (Social Science History) Armando Razo

This innovative new book contributes simultaneously to two different disciplinary fields: comparative political economy and Mexican history. It does so by attempting to explain why Mexico—contrary to the predictions of several dominant theories of economic growth—enjoyed a comparatively high rate of economic growth and development under the highly authoritarian dictatorship of Porfirio Diaz (1876–1911). In conducting a detailed political analysis of Diaz's rule, Armando Razo introduces network analysis to the study of institutions and growth, and shows how dictators can maintain their power with credible growth-enhancing policies.
