Research Methods & Statistics in Psychology 4th Edition Hugh Coolican

Research Methods & Statistics in Psychology, 4th edition, has been substantially revised and updated, and provides a clear and comprehensive survey of research methods, statistical concepts and procedures in psychology today.

Clear explanations of experimental and non-experimental designs are provided and there is detailed attention to a wide range of threats to internal and external validity. Quasi-experiments, cross-cultural issues, ethics and the ongoing quantitative-qualitative debate are all fully explored.

Statistical procedures are given clear and comprehensive coverage, and include everything needed at all levels of study - from nominal level tests to multi-factorial ANOVA designs and multiple regression. New to the fourth edition are log linear analysis and a detailed examination of effect size and power, enabling students to report very easily the level of power for their findings.

Also new for this edition are detailed and illustrated SPSS instructions for all statistical procedures covered in the book, including data entry and interpreting output, thus eliminating the need for an extra SPSS textbook.

Each chapter contains a self-test glossary, key terms and exercises. Advice on planning and conducting studies, analysing data and writing up practical reports is given, and a 'good' marked report is included, as well as a complete published qualitative report. A much-requested new feature is advice, for each statistical test, on how to report results in conventional (APA) style.

The bestselling research methods text for over a decade, *Research Methods & Statistics in Psychology, 4th edition*, remains accessible, informative and invaluable to students of psychology and related disciplines at all levels.

From reader reviews:

Jessie Lloyd:

Reading a book tends to be new life style in this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Using book everyone in this world could share their idea. Ebooks can also inspire a lot of people. Plenty of author can inspire their own reader with their story or their experience. Not only the storyplot that share in the books. But also they write about the knowledge about something that you need instance. How to get the good score toefl, or how to teach your young ones, there are many kinds of book that exist now. The authors in this world always try to improve their proficiency in writing, they also doing some investigation before they write to the book. One of them is this Research Methods & Statistics in Psychology 4th Edition.

Stephanie Knowles:

Playing with family inside a park, coming to see the marine world or hanging out with close friends is thing that usually you may have done when you have spare time, after that why you don't try matter that really opposite from that. 1 activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition info. Even you love Research Methods & Statistics in Psychology 4th Edition, you could enjoy both. It is good combination right, you still need to miss it? What kind of hang type is it? Oh occur its mind hangout people. What? Still don't have it, oh come on its referred to as reading friends.

Richard Horgan:

Is it an individual who having spare time then spend it whole day simply by watching television programs or just lying down on the bed? Do you need something new? This Research Methods & Statistics in Psychology 4th Edition can be the reply, oh how comes? It's a book you know. You are thus out of date, spending your extra time by reading in this fresh era is common not a geek activity. So what these ebooks have than the others?

Michael Hansen:

That publication can make you to feel relax. This particular book Research Methods & Statistics in Psychology 4th Edition was colorful and of course has pictures around. As we know that book Research Methods & Statistics in Psychology 4th Edition has many kinds or variety. Start from kids until adolescents. For example Naruto or Investigator Conan you can read and think you are the character on there. Therefore , not at all of book are usually make you bored, any it offers you feel happy, fun and loosen up. Try to choose the best book in your case and try to like reading that will.
