Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches

Monitoring Land Supply with Geographic Information Systems Theory, Practice, and Parcel-Based Approaches

Monitoring the supply of buildable land and its capacity to accommodate growth within urbanizing regions is an increasingly important component of urban planning and growth management. Recent developments in Geographic Information Systems (GIS) have opened up new opportunities for local and regional government to monitor land supply and capacity. Based on a study sponsored by the Lincoln Institute of Land Policy, this book reviews the state of the art in land monitoring, particularly as it benefits from the introduction of GIS data and analysis capabilities at the level of individual land parcels.

Monitoring Land Supply with Geographic Information Systems addresses:

- * Technical and methodological frameworks for data collection and analysis as well as applications to a range of policy concerns
- * Case studies of successful land monitoring programs, including Portland, Oregon; Montgomery County, Maryland; and the Puget Sound Regional Council in Washington
- * Thematic topics ranging from database design to urban simulation modeling to organizational contexts
- * Detailed findings of a national survey of land supply monitoring programs

This guide presents a comprehensive, timely, and critical overview of a fast-emerging field of planning and policy analysis. It provides an invaluable resource to professionals, including land use and economic development planners, GIS analysts, local government officials, and private developers.

From reader reviews:

Betty Ahlstrom:

The book Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches has a lot of information on it. So when you check out this book you can get a lot of help. The book was compiled by the very famous author. The author makes some research just before write this book. This kind of book very easy to read you can get the point easily after looking over this book.

William Prentice:

Your reading sixth sense will not betray a person, why because this Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches publication written by well-known writer whose to say well how to make book that may be understand by anyone who else read the book. Written throughout good manner for you, still dripping wet every ideas and producing skill only for eliminate your current hunger then you still hesitation Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches as good book not just by the cover but also with the content. This is one guide that can break don't evaluate book by its handle, so do you still needing yet another sixth sense to pick this specific!? Oh come on your examining sixth sense already said so why you have to listening to an additional sixth sense.

Johnny Cahill:

As we know that book is vital thing to add our understanding for everything. By a book we can know everything you want. A book is a range of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches was filled regarding science. Spend your time to add your knowledge about your research competence. Some people has different feel when they reading a new book. If you know how big selling point of a book, you can sense enjoy to read a e-book. In the modern era like today, many ways to get book that you wanted.

William Pettigrew:

Do you like reading a publication? Confuse to looking for your selected book? Or your book was rare? Why so many concern for the book? But almost any people feel that they enjoy with regard to reading. Some people likes studying, not only science book and also novel and Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches or maybe others sources were given expertise for you. After you know how the fantastic a book, you feel need to read more and more. Science e-book was created for teacher or students especially. Those books are helping them to increase their knowledge. In various other case, beside science book, any other book likes Monitoring Land Supply with Geographic Information Systems : Theory, Practice, and Parcel-Based Approaches to make your spare time much more colorful. Many types of book like this.
