Water Security: The Water-Food-Energy-Climate Nexus

The World Economic Forum Water Initiative

Water Security: The Water-Food-Energy-Climate Nexus The World Economic Forum Water Initiative
The world is on the brink of the greatest crisis it has ever faced: a spiraling lack of fresh water. Groundwater is drying up, even as water demands for food production, for energy, and for manufacturing are surging. Water is already emerging as a headline geopolitical issue—and worsening water security will soon have dire consequences in many parts of the global economic system.

Directed by UN Secretary General Ban Ki-Moon at the 2008 Davos Annual Meeting, the World Economic Forum assembled the world's foremost group of public, private, non-governmental-organization and academic experts to examine the water crisis issue from all perspectives. The result of their work is this forecast—a stark, non-technical overview of where we will be by 2025 if we take a business-as-usual approach to (mis)managing our water resources. The findings are shocking. Perhaps equally stunning are the potential solutions and the recommendations that the group presents. All are included in this landmark publication.

Water Security contains compelling commentary from leading decision-makers, past and present. The commentary is supported by analysis from leading academics of how the world economy will be affected if world leaders cannot agree on solutions. The book suggests how business and politics need to manage the energy-food-water-climate axis as leaders negotiate the details of the climate regime that replace Kyoto Protocols.

Mohammad Darling:

In this particular era which is the greater man or woman or who has ability to do something more are more precious than other. Do you want to become one of it? It is just simple approach to have that. What you must do is just spending your time little but quite enough to experience a look at some books. On the list of books in the top record in your reading list is definitely Water Security: The Water-Food-Energy-Climate Nexus. This book that is certainly qualified as The Hungry Inclines can get you closer in becoming precious person. By looking upwards and review this reserve you can get many advantages.

Robert Shaw:

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library or to make summary for some publication, they are complained. Just small students that has reading's spirit or real their interest. They just do what the professor want, like asked to the library. They go to at this time there but nothing reading critically. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore this Water Security: The Water-Food-Energy-Climate Nexus can make you feel more interested to read.
