Human Toxicology of Chemical Mixtures, Second Edition

Harold Zeliger

Human Toxicology of Chemical Mixtures, Second Edition Harold Zeliger

In this important reference work, Zeliger catalogs the known effects of chemical mixtures on the human body and also proposes a framework for understanding and predicting their actions in terms of lipophile (fat soluble) / hydrophile (water soluble) interactions. The author's focus is on illnesses that ensue following exposures to mixtures of chemicals that cannot be attributed to any one component of the mixture.

In the first part the mechanisms of chemical absorption at a molecular and macromolecular level are explained, as well as the body's methods of defending itself against xenobiotic intrusion. Part II examines the sources of the chemicals discussed, looking at air and water pollution, food additives, pharmaceuticals, etc. Part III, which includes numerous case studies, examines specific effects of particular mixtures on particular body systems and organs and presents a theoretical framework for predicting what the effects of uncharacterized mixtures might be. Part IV covers regulatory requirements and the need to adjust recommended exposure levels for products containing mixtures. It also contains recommendations on how to limit exposure to mixtures in the products we use and on how to limit release of mixtures into the environment.

Providing brief summaries of each mixture and its effects, Zeliger provides a comprehensive reference, a jumping off point for professionals (with extensive chapter bibliographies) and an introduction to the topic for those studying traditional toxicology.

Addressing many inadequately understood illnesses and conditions such as asthma, infertility and cancer, it will also be of interest to health professionals, environmental scientists and lawyers.

- Presents a theoretical framework for predicting the effects of chemical mixtures

for which no specific data exists (this predictive aspect is important due to the vast number of different potential chemical combinations - far too many to comprehensively catalog).

- A quick and convenient source of hard to come by data on the rapidly developing field of chemical mixtures, for groups including chemists and engineers, toxicologists, health professionals and environmental scientists.
- New and updated material comprises over 30% of this timely new edition, which includes the latest research data alongside an expanded introduction to the science and art of predicting the toxicological properties of chemical mixtures.

From reader reviews:

Holly Flynn:

Have you spare time for any day? What do you do when you have much more or little spare time? Yes, you can choose the suitable activity to get spend your time. Any person spent all their spare time to take a wander, shopping, or went to often the Mall. How about open or read a book eligible Human Toxicology of Chemical Mixtures, Second Edition? Maybe it is for being best activity for you. You already know beside you can spend your time together with your favorite's book, you can more intelligent than before. Do you agree with it is opinion or you have additional opinion?

Salina Juarez:

Do you considered one of people who can't read pleasurable if the sentence chained inside straightway, hold on guys this kind of aren't like that. This Human Toxicology of Chemical Mixtures, Second Edition book is readable through you who hate the straight word style. You will find the data here are arrange for enjoyable reading through experience without leaving also decrease the knowledge that want to supply to you. The writer of Human Toxicology of Chemical Mixtures, Second Edition content conveys objective easily to understand by many people. The printed and e-book are not different in the written content but it just different in the form of it. So , do you nevertheless thinking Human Toxicology of Chemical Mixtures, Second Edition is not loveable to be your top collection reading book?

Martha Skaggs:

Information is provisions for folks to get better life, information presently can get by anyone at everywhere. The information can be a know-how or any news even an issue. What people must be consider if those information which is inside the former life are challenging be find than now could be taking seriously which one is appropriate to believe or which one the actual resource are convinced. If you receive the unstable resource then you understand it as your main information there will be huge disadvantage for you. All those possibilities will not happen throughout you if you take Human Toxicology of Chemical Mixtures, Second Edition as your daily resource information.

Eugene Howard:

The actual book Human Toxicology of Chemical Mixtures, Second Edition will bring that you the new experience of reading a new book. The author style to spell out the idea is very unique. In the event you try to find new book to study, this book very appropriate to you. The book Human Toxicology of Chemical Mixtures, Second Edition is much recommended to you to see. You can also get the e-book from official web site, so you can easier to read the book.
