Excerpt from Cholesterol Measurement: Error and Variability, Vol. 4: Hearing Before the Subcommittee on Technology of the Committee on Science, U. S. House of Representatives, One Hundred Fourth Congress, First Session, February 14, 1995

The subcommittee met, pursuant to call, at 1:05 p.m. in Room 2318 of the Rayburn House Office Building, the Honorable Constance A. Morella, chairwoman of the subcommittee, presiding.

Mrs. Morella. I think we will start now.

It is a great pleasure to convene our first meeting of the Subcommittee on Technology of the House Science Committee.

It isn't official yet, but we have some reason to believe that this is the first Congressional committee or subcommittee in the history of the House of Representatives comprised of a majority of women.

I am excited about that, given the context especially of 48 out of 435 Members in the House, but I am also very excited about the issues that will be coming before our subcommittee during this Congress.

Technology lies close to the heart of everything that we do and offers all of us a more prosperous and bountiful future. Technology offers us much promise. The promise of a safer and cleaner environment; the promise of more profitable and competitive industries; the promise of a more informed, better educated, and healthier citizenry. Realizing these promises is the important work to which we will all be dedicating ourselves.

This subcommittee has a distinguished history of exercising jurisdiction whenever technology or technological research has had an impact on the lives, the health, or the prosperity of the American people. And I can't think of a more interesting or important topic than the one before us today: the accuracy of cholesterol measurement.

This is especially true today, on Valentine's Day, when I am sure that most Americans are paying attention to the hearts they have, and the hearts that they want to keep.

Today's hearing grows out of the work conducted by the former Investigations and Oversight Subcommittee on which I served as the Ranking Member in the past Congress.

We owe a debt of gratitude to the two former chairmen who helped to make this hearing possible today.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
