Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) Susmita Dasgupta, Asif Zaman, Subhendu Roy, Mainul Huq, Sarwar Jahan, Ainun Nishat

Intense rainfall floods Dhaka, Bangladesh, one of the world's fastest-growing megacities, year in and year out, and those in the city's slums and shanties are usually the most affected. Low-lying flood plains, rivers, and canals that once drained water are gradually filling up as a result of indiscriminate urbanization and now magnify rather than help solve the problem. The climate outlook for South Asia in the 21st century is heavier and more erratic rainfall during the monsoon season, according to the Fifth Assessment Report of the Intergovernmental Panel on Climate Change and the World Meteorological Organization. Thus, climate change may further aggravate Dhaka's flood vulnerability.

As such, Dhaka needs to better manage its flood drainage infrastructure and strengthen the city's climate disaster resilience and adaptive capacity. But climate-smart policies require local planners to better understand the likely damage from current flooding, potential damage from climate-related risks, and measures that can be taken to cope with current and future flooding and adaptation costs. *Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk* assesses Dhaka's preparedness for urban flood emergencies, estimates probable damage from extreme rainfall events by 2050 with or without climate change, develops structural adaptation measures to cope with current and future flooding, evaluates the reduction in economic damage resulting from implementing these measures, and estimates their cost.

The analysis in this book will help Bangladesh's policy makers take targeted steps to mitigate urban flooding in Dhaka and improve the city's resilience in the face of climate change and variability. Equipped with a host of investment options designed to address current flooding and further climate-proof urban infrastructure, local decision makers will be able to develop realistic, yet effective, strategies that prioritize interventions and sequence activities.

From reader reviews:

Amy Medina:

Here thing why this specific Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) are different and trustworthy to be yours. First of all reading a book is good nonetheless it depends in the content of computer which is the content is as yummy as food or not. Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) giving you information deeper and different ways, you can find any e-book out there but there is no e-book that similar with Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development). It gives you thrill studying journey, its open up your own eyes about the thing this happened in the world which is perhaps can be happened around you. It is easy to bring everywhere like in playground, café, or even in your technique home by train. Should you be having difficulties in bringing the paper book maybe the form of Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) in e-book can be your option.

Leonard Dail:

The event that you get from Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) may be the more deep you looking the information that hide within the words the more you get considering reading it. It doesn't mean that this book is hard to be aware of but Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) giving you thrill feeling of reading. The article writer conveys their point in selected way that can be understood through anyone who read it because the author of this e-book is well-known enough. This particular book also makes your own vocabulary increase well. It is therefore easy to understand then can go to you, both in printed or e-book style are available. We highly recommend you for having this kind of Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) instantly.

Laura Clark:

Reading can called brain hangout, why? Because if you find yourself reading a book mainly book entitled Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) your mind will drift away trough every dimension, wandering in most aspect that maybe unknown for but surely might be your mind friends. Imaging every word written in a publication then become one type conclusion and explanation this maybe you never get previous to. The Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development) giving you another experience more than blown away your mind but also giving you useful facts for your better life with this era. So now let us present to you the relaxing pattern the following is your body and mind will likely be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary wasting spare time activity?

Lidia Mejia:

A lot of guide has printed but it is different. You can get it by web on social media. You can choose the most effective book for you, science, witty, novel, or whatever by means of searching from it. It is named of book Urban Flooding of Greater Dhaka in a Changing Climate: Building Local Resilience to Disaster Risk (Directions in Development). You can include your knowledge by it. Without leaving behind the printed book, it might add your knowledge and make a person happier to read. It is most crucial that, you must aware about guide. It can bring you from one spot to other place.
