Ole G. Mouritsen, Luis A. Bagatolli

LIFE - AS A MATTER OF FAT: Lipids in a Membrane Biophysics Perspective (The Frontiers Collection) Ole G. Mouritsen, Luis A. Bagatolli

The present book gives a multi-disciplinary perspective on the physics of life and the particular role played by lipids (fats) and the lipid-bilayer component of cell membranes. The emphasis is on the physical properties of lipid membranes seen as soft and molecularly structured interfaces. By combining and synthesizing insights obtained from a variety of recent studies, an attempt is made to clarify what membrane structure is and how it can be quantitatively described. Furthermore, it is shown how biological function mediated by membranes is controlled by lipid membrane structure and organization on length scales ranging from the size of the individual molecule, across molecular assemblies of proteins and lipid domains in the range of nanometers, to the size of whole cells. Applications of lipids in nanotechnology and biomedicine are also described.

The first edition of the present book was published in 2005 when lipidomics was still very much an emerging science and lipids about to be recognized as being as important for life as proteins, sugars, and genes. This significantly expanded and revised edition takes into account the tremendous amount of knowledge gained over the past decade. In addition, the book now includes more tutorial material on the biochemistry of lipids and the principles of lipid self-assembly.

The book is aimed at undergraduate students and young research workers within physics, chemistry, biochemistry, molecular biology, nutrition, as well as pharmaceutical and biomedical sciences.

From the reviews of the first edition:

"This is a highly interesting book and a pleasure to read. It represents a new and excellent pedagogical introduction to the field of lipids and the biophysics of biological membranes. I reckon that physicists and chemists as well as biologists will benefit from this approach to the field and Mouritsen shows a deep insight into the physical chemistry of lipids." (Göran Lindblom, Chemistry

and Physics of Lipids 2005, vol. 135, page 105-106)

"The book takes the reader on an exciting journey through the lipid world, and Mouritsen attracts the attention with a lively style of writing ... a comprehensive view of the 'lipid sea' can be easily achieved, gaining the right perspectives for envisaging future developments in the nascent field of lipidomics." (Carla Ferreri, ChemBioChem, Vol. 6 (8), 2005)

From reader reviews:

Gerald James:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to be aware of everything in the world. Each book has different aim or even goal; it means that reserve has different type. Some people feel enjoy to spend their a chance to read a book. They can be reading whatever they take because their hobby is definitely reading a book. How about the person who don't like reading a book? Sometime, particular person feel need book when they found difficult problem or exercise. Well, probably you will require this LIFE - AS A MATTER OF FAT: Lipids in a Membrane Biophysics Perspective (The Frontiers Collection).

Patricia Watts:

Playing with family in a very park, coming to see the marine world or hanging out with friends is thing that usually you have done when you have spare time, and then why you don't try matter that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love LIFE - AS A MATTER OF FAT: Lipids in a Membrane Biophysics Perspective (The Frontiers Collection), you can enjoy both. It is very good combination right, you still wish to miss it? What kind of hang type is it? Oh can happen its mind hangout fellas. What? Still don't obtain it, oh come on its referred to as reading friends.

Kristen Clifford:

Are you kind of hectic person, only have 10 as well as 15 minute in your day time to upgrading your mind proficiency or thinking skill possibly analytical thinking? Then you are having problem with the book as compared to can satisfy your small amount of time to read it because all of this time you only find guide that need more time to be examine. LIFE - AS A MATTER OF FAT: Lipids in a Membrane Biophysics Perspective (The Frontiers Collection) can be your answer as it can be read by you actually who have those short extra time problems.

Norman Fuentes:

You may spend your free time to study this book this reserve. This LIFE - AS A MATTER OF FAT: Lipids in a Membrane Biophysics Perspective (The Frontiers Collection) is simple to develop you can read it in the park, in the beach, train along with soon. If you did not have much space to bring the actual printed book, you can buy the particular e-book. It is make you better to read it. You can save the book in your smart phone. Thus there are a lot of benefits that you will get when one buys this book.
