Perioperative Medicine: Medical Consultation and Co-management (Hospital Medicine: Current Concepts, Vol. 4) Amir K. Jaffer, Paul Grant

Provides a comprehensive evidence-based guide to the management of the growing population of patients who require perioperative care

Perioperative Medicine: Medical Consultation and Co-Management is the first comprehensive reference text developed specifically for hospitalists but envisioned also to help internists, anesthesiologists, allied health professionals, fellows, residents, and medical students manage various aspects of the medical care of the surgical patient. The book features both the preoperative and postoperative medical management of the surgical patient. It focuses on systems, operations, quality of perioperative care, and preoperative assessment of the patient, all in consideration with system-specific risk and evidence-based strategies that minimize risk. It places special emphasis on care of the older hospitalized surgical patient and offers a thorough discussion of post-operative conditions and their management.

Chapters cover vital topics such as:

- Hospitalist as a Medical Consultant
- Co-Management of the Surgical Patient
- Preoperative Evaluation
- Improving the Quality and Outcomes of Perioperative Care
- Developing, Implementing, and Operating a Preoperative Clinic
- Assessing and Managing Risk of Major Organ Systems
- Assessing and Managing Disorders for Surgery
- Postoperative Care and Co-Management by Surgery Type
- Managing Common Postoperative Conditions

With the core responsibilities of perioperative care falling more and more on the shoulders of hospitalists, internists, and allied health professionals, *Perioperative Medicine* is a much-needed guide for managing the clinical and operational issues associated with caring for hospitalized surgical patients.
