**Traffic Grooming in Optical WDM Mesh Networks (Optical Networks)** Zhu Keyao, Hongyue Zhu, Biswanath Mukherjee

Optical networks based on wavelength-division multiplexing (WDM) technology offer the promise to satisfy the bandwidth requirements of the Internet infrastructure, and provide a scalable solution to support the bandwidth needs of future applications in the local and wide areas. In a wavelength-routed network, an optical channel, referred to as a lightpath, is set up between two network nodes for communication. Using WDM technology, an optical fiber link can support multiple non-overlapping wavelength channels, each of which can be operated at the data rate of 10 Gbps or 40 Gbps today. On the other hand, only a fraction of customers are expected to have a need for such a high bandwidth. Due to the large cost of the optical backbone infrastructure and enormous WDM channel capacity, connection requests with diverse low-speed bandwidth requirements need to be efficiently groomed onto high-capacity wavelength channels. This book investigates the optimized design, provisioning, and performance analysis of traffic-groomable WDM networks, and proposes and evaluates new WDM network architectures. Organization of the Book Significant amount of research effort has been devoted to traffic grooming in SONET/WDM ring networks since the current telecom networks are mainly deployed in the form of ring topologies or interconnected rings. As the long-haul backbone networks are evolving to irregular mesh topologies, traffic grooming in optical WDM mesh networks becomes an extremely important and practical research topic for both industry and academia.

### **From reader reviews:**

#### **Stanley Kamp:**

The book Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) can give more knowledge and information about everything you want. Why must we leave a good thing like a book Traffic Grooming in Optical WDM Mesh Networks (Optical Networks)? Wide variety you have a different opinion about guide. But one aim that book can give many data for us. It is absolutely correct. Right now, try to closer with the book. Knowledge or facts that you take for that, you may give for each other; you are able to share all of these. Book Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) has simple shape but the truth is know: it has great and massive function for you. You can appearance the enormous world by available and read a guide. So it is very wonderful.

#### **Lane James:**

In this 21st millennium, people become competitive in every single way. By being competitive at this point, people have do something to make all of them survives, being in the middle of the crowded place and notice by simply surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. Yeah, by reading a guide your ability to survive improve then having chance to stand than other is high. For you personally who want to start reading some sort of book, we give you that Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) book as basic and daily reading e-book. Why, because this book is greater than just a book.

#### **Larry Turner:**

As people who live in often the modest era should be change about what going on or information even knowledge to make these people keep up with the era which can be always change and progress. Some of you maybe can update themselves by studying books. It is a good choice for you personally but the problems coming to you actually is you don't know what one you should start with. This Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

#### **Alexander Pridmore:**

Do you have something that you prefer such as book? The e-book lovers usually prefer to choose book like comic, quick story and the biggest you are novel. Now, why not hoping Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) that give your enjoyment preference will be satisfied by reading this book. Reading behavior all over the world can be said as the way for people to know world a great deal better then how they react in the direction of the world. It can't be said constantly that reading practice only for the geeky man but for all of you who wants to become success person. So , for all of you who want to start looking at as your good habit, you can pick Traffic Grooming in Optical WDM Mesh Networks (Optical Networks) become your starter.
