Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering)

John P. Boyd

Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) John P. Boyd

The goal of this book is to teach spectral methods for solving boundary value, eigenvalue, and time-dependent problems. Although the title speaks only of Chebyshev polynomials and trigonometric functions, the book also discusses Hermite, Laguerre, rational Chebyshev, sinc, and spherical harmonic functions. These notes evolved from a course I have taught the past five years to an audience drawn from half a dozen different disciplines at the University of Michigan: aerospace engineering, meteorology, physical oceanography, mechanical engineering, naval architecture, and nuclear engineering. With such a diverse audience, this book is not focused on a particular discipline, but rather upon solving differential equations in general. The style is not lemma-theorem-Sobolev space, but algorithms guidelines-rules-of-thumb. Although the course is aimed at graduate students, the required background is limited. It helps if the reader has taken an elementary course in computer methods and also has been exposed to Fourier series and complex variables at the undergraduate level. However, even this background is not absolutely necessary. Chapters 2 to 5 are a self contained treatment of basic convergence and interpolation theory.

From reader reviews:

Ana Steadman:

Now a day those who Living in the era where everything reachable by connect with the internet and the resources within it can be true or not demand people to be aware of each information they get. How people have to be smart in acquiring any information nowadays? Of course the answer is reading a book. Examining a book can help people out of this uncertainty Information especially this Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) book because book offers you rich data and knowledge. Of course the knowledge in this book hundred pct guarantees there is no doubt in it you may already know.

John Mendoza:

This Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) usually are reliable for you who want to be considered a successful person, why. The reason of this Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) can be among the great books you must have is giving you more than just simple examining food but feed an individual with information that probably will shock your prior knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions both in e-book and printed types. Beside that this Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) giving you an enormous of experience for instance rich vocabulary, giving you trial run of critical thinking that we all know it useful in your day activity. So , let's have it and revel in reading.

Santos Conrad:

This Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) is new way for you who has interest to look for some information as it relief your hunger of information. Getting deeper you in it getting knowledge more you know otherwise you who still having tiny amount of digest in reading this Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) can be the light food for you because the information inside this particular book is easy to get by simply anyone. These books build itself in the form which is reachable by anyone, yes I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there isn't any in reading a e-book especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss the item! Just read this e-book variety for your better life along with knowledge.

Jennifer David:

Reading a guide make you to get more knowledge from it. You can take knowledge and information from a book. Book is written or printed or illustrated from each source in which filled update of news. In this particular modern era like at this point, many ways to get information are available for a person. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, fresh and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just looking for the Chebyshev & Fourier Spectral Methods (Lecture Notes in Engineering) when you essential

it?
