User-Centred Requirements Engineering Alistair Sutcliffe

If you have picked up this book and are browsing the Preface, you may well be asking yourself "What makes this book different from the large number I can find on amazon. com?". Well, the answer is a blend of the academic and the practical, and views of the subject you won't get from anybody else: how psychology and linguistics influence the field of requirements engineering (RE). The title might seem to be a bit of a conundrum; after all, surely requirements come from people so all requirements should be user-centred. Sadly, that is not always so; many system disasters have been caused simply because requirements engineering was not user-centred or, worse still, was not practised at all. So this book is about putting the people back into computing, although not simply from the HCI (human-computer interaction) sense; instead, the focus is on how to understand what people want and then build appropriate computer systems.

From reader reviews:

Willie Long:

Nowadays reading books be than want or need but also become a life style. This reading habit give you lot of advantages. Associate programs you got of course the knowledge the actual information inside the book this improve your knowledge and information. The details you get based on what kind of e-book you read, if you want send more knowledge just go with schooling books but if you want sense happy read one with theme for entertaining such as comic or novel. The actual User-Centred Requirements Engineering is kind of reserve which is giving the reader unforeseen experience.

Carolyn Bailey:

Often the book User-Centred Requirements Engineering has a lot details on it. So when you read this book you can get a lot of benefit. The book was written by the very famous author. Tom makes some research previous to write this book. That book very easy to read you will get the point easily after scanning this book.

Raymond Floyd:

People live in this new day time of lifestyle always aim to and must have the free time or they will get great deal of stress from both day to day life and work. So , whenever we ask do people have extra time, we will say absolutely yes. People is human not just a robot. Then we consult again, what kind of activity do you have when the spare time coming to you of course your answer can unlimited right. Then do you ever try this one, reading publications. It can be your alternative in spending your spare time, often the book you have read is User-Centred Requirements Engineering.

Marline Deluca:

As we know that book is significant thing to add our knowledge for everything. By a e-book we can know everything you want. A book is a list of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This guide User-Centred Requirements Engineering was filled concerning science. Spend your extra time to add your knowledge about your scientific research competence. Some people has distinct feel when they reading any book. If you know how big advantage of a book, you can feel enjoy to read a e-book. In the modern era like today, many ways to get book you wanted.
