People have been on this planet for thousands and thousands of years, yet the greatest strides in science and technology have all been made within the last hundred years. What technological strides will be made in the next hundred year? The possibilities are endless. But scientific discoveries sometimes create moral dilemmas- the ultimate good has to be weighed against possible abuse or disaster. Think of nuclear energy, for example. How is it useful to humanity? How is it destructive? Do the positive aspects outweigh the negative? A science fiction story explores the frontiers of technology, but that is not its only purpose. Science fiction also explores moral dilemmas. In these two science fiction stories, you will have to decide for yourself whether the scientific discoveries are for the good of humanity or not.
